

# nTrack

*A tracking system for VET graduates*

## **The aims of the project are:**

- To analyze, in depth, the context and need in each country.
- To develop a tracking system for VET graduates at institutional level that will feed into the quality assurance system of the VET provider.
- To pilot test and implement the tracking system, establish tracking mechanism and integrate it, in VET monitoring processes.
- To support VET providers to establish the tracking mechanism and integrate it into their quality assurance system.

“On Track” project addresses European policies and priorities and respond to common needs of European VET providers. The transnational partnership guarantees the development of a tracking mechanism and tools that respond to the needs of all the countries involved and can be also transferred in other countries.

From the 15th to the 17th of January the short term joint staff training event took place in Athens at IEK DELTA.

Topic of the Training:

ESTABLISHING A TRACKING MECHANISM IN A VET INSTITUTION.

## Piloting

We will be testing the tracking system twice in each location starting in April 2020.

- ✓ recent graduates (6 months)
- ✓ older graduates (2 years)

In case your VET center wants to take part in the piloting of the tracking system please get in touch with the contact person in your country.
