Is your organization interested in tracking VET graduates?

Take a look to the OnTrack project!

Why are we carrying out this projects?

Good quality information about what VET graduates do after leaving education and training, how they use the knowledge, skills and competences they gained, is essential to understand both the causes of employability problems and the success factors in particular regions, economic sectors or for graduates from particular VET institutes and disciplines. The project "On Track" responds to the identified gap and will develop, evaluate and put in use a **VET graduates tracking system** for graduates of initial vocational education and training schools and institutes.

What are the aims of the project?

- To analyze, in depth, the context and need in each country.
- To develop a tracking system for VET graduates at institute level that will feed into the quality assurance system of the VET provider.
- To pilot test and implement the tracking system, establish tracking mechanism and integrate it, in VET monitoring processes.
- To support VET providers to establish the tracking mechanism and integrate it into their quality assurance system

PROJECT MEETINGS

The first project meeting took place in Vienna between the 15th and 16th of November. We got to know each other and it helped us to establish the pillars of the project!

The second meeting took place the 9th and 10th of May in Sofia, Bulgaria. We compared the tracking context of each country and set the necessary steps to create the Tracking system!
